BE READY FOR DEPLOYMENT

At security essen 2024, you will be able to discover all the latest developments in the field of special forces. Equipment used in this sector must always be specifically tailored to its respective tasks and meet the highest standards in terms of quality, functionality and safety. In an exhibition area specially created for this topic, authorities and organisations will find everything they need to optimally kit out their teams and prepare them for any mission they face.

- **Protective clothing:** special clothing, such as protective waistcoats, helmets, protective gloves and boots
- **Weaponry:** assault rifles, handguns, precision and automatic weapons, ammunition
- **Technical equipment:** night-vision devices, sound and thermal imaging cameras, communication and tracking devices, explosives and access technology, armoured and special vehicles, as well as other means of transport

- **First-aid supplies:** medical equipment, devices and bandages
- **Other accessories:** ropes, climbing gear, smoke and stun grenades, torches, etc.

security essen offers exhibitors the unique opportunity to showcase their products and services at one of the biggest security trade fairs in the world. Build valuable contacts with international decision-makers and industry experts.

With the new special forces exhibitor space, security essen is directly targeting the police, national and international military special forces, emergency services, intelligence agencies, customs and other target groups.
